SUMMARY

Self-driven paid media analyst with experience optimizing campaigns across Meta, TikTok, and other digital channels for eCommerce brands. Skilled in analyzing KPIs like CVR, CPA, and ROAS, testing creatives and campaign structure, and driving data-backed performance improvements.

EDUCATION

University of California, Berkeley Berkeley, CA
Master of Computational Social Science (Marketing analytics track) *May 2026*
Coursework: Advanced Computing, Advanced Statistics, Data Visualization, Marketing Analytics, Machine Learning

Bryn Mawr College Bryn Mawr, PA
Bachelor of Art in Psychology, Minor Data Science *May 2025*

EXPERIENCE

A Round Entertainment| Marketing and Growth Analyst Intern| Remote December 2025-present

- Built and maintained Tableau dashboards tracking acquisition funnels, engagement, and spend efficiency; delivered insights to guide marketing and product decisions.
- Owned and optimized paid ads campaigns across Meta, TikTok, and in-app channels; monitored performance trends (CVR, CAC, ROI) and implemented adjustments, driving a 20% increase in app downloads.
- Led structured A/B testing on creatives, landing pages, and email messaging; translated performance data into optimization strategies, improving user engagement by 10%.

R2dio| Marketing Analyst Intern| Berkeley, CA August 2025-December 2025

- Queried GA4, product usage logs, and Apollo firmographic data using SQL to segment high-intent audiences and inform targeting and acquisition strategy.
- Built and optimized CRM workflows in HubSpot and LinkedIn Sales Navigator, improving lead targeting and increasing lead-to-conversation conversion by 20%.
- Designed and executed email automation and A/B testing strategies, analyzing funnel performance (open, CTR, conversion) to improve campaign efficiency and increase pipeline performance by 25%.

Reckitt (Mead Johnson)| Consumer & Ecommerce Insights Analyst Intern | Remote June 2025-August 2025

- Developed data-driven social media campaign strategies using social listening, trend research, and client satisfaction analysis, collaborating cross-functionally to optimize account exposure and drove a 10% increase in engagement.
- Queried ecommerce data using SQL and built Tableau dashboards tracking key performance metrics to inform pricing strategy, promotion optimization, SKU selection and product page layout.

Girl Effect (Capstone Project) Jan 2026-Present

- Analyzed large-scale user interaction data from Big Sis, applying clustering and pathway analysis to uncover user archetypes and key drop-off points across the engagement funnel.
- Developed behavioral segmentation frameworks to optimize user journeys and personalize interventions, increasing effective transitions to health services and human support.

Spotify Reviews: Analyzing Consumer Feedback on Spotify (Python Project) August 2025-December 2025
Scraped and analyzed 17M+ Spotify app reviews from Google Play using VADER sentiment analysis and BERTopic to identify user pain points and feature preferences
